Event details

Seminar: Universal Smart Card Systems 10:00 – 13:00

"Universal Smart card systems" will be targeted at anyone involved in the design, development, implementation and maintenance of systems that use smart cards including transport systems, identification (ID) systems, point of sale systems, cash machines and other financial services. It will showcase the issues and benefits in making these systems Universally Designed, that is, designed to be used by the widest range of people possible, regardless of age, disability or size.

Design workshop: Users in Design Workshop 14:00 – 16:30

This facilitated interactive session will be on Inclusive/Universal Design methodologies. The seminar will include an interactive session with John Clarkson, Director, Cambridge Engineering Design Centre, utilising simulators and incorporating design exercises. See www.inclusivedesigntoolkit.com/

Note: Numbers are strictly limited to 32 participants for this session.
